DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to a semiconductor device.

Group II, claims 8-10, drawn to a method of manufacturing a semiconductor device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II is a process for producing the structure of Group I, however, this process is not specifically adapted for the manufacture of the claimed structure. For example, "patterning the substrate from the second side so as to expose the bond pad regions" as recited in line 8 of claim 8 does not inherently result in the structure of claim 1. Furthermore, the structure of claim 1 can be formed by another and materially different process, for example, the bond pads and substrate could be separately selectively formed on the protective security coating, as opposed to formed then patterned as claimed in claim 8.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2811

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
